

Day-of Cram Card

Haitong Bank Macau — Corporate Banking Analyst · read this, nothing else, on the morning

1 · The Bank — 5 facts

- Haitong Bank S.A. — incorporated in **Lisbon, Portugal; EU-regulated** (Banco de Portugal / ECB)
- Wholly owned by **Guotai Haitong Securities** (China's largest brokerage after the 2025 merger, ~USD 40bn mkt cap)
- Macau Branch opened **Oct 2021**; mission: **GBA bond-issuance hub** + cross-border bridgehead
- Branch track record: Joint Lead Manager on **21 MOX bond deals** (2023); **first market-maker on MCSD**
- AMCM **deposit-taking approval May 2024** — still unused (deposits = 0 at end-2025)

2 · Branch financials — know these cold (MOP)

Metric	2023	2024	2025
Profit	69.6m	54.3m	-13.1m (first loss)
Operating income	111.2m	101.2m	23.6m
Net fees (DCM/M&A)	106.7m	92.8m	8.2m (-91%)
NII	3.5m	11.6m	13.6m
Costs (≈ fixed)	~32.9m	~36.8m	~38.6m
Total assets	194.5m	280.9m	502.1m
Head Office loan	0	31.8m	274.7m

The one-sentence story: single-engine fee shop → fees -91% in 2025 → first loss; NII covers only ~35% of costs; deposit licence idle; funded by expensive HO money. **I am the second engine.**

3 · Dali Foods STAR — anchor facts

- **3799.HK** · founder **Xu Shihui** family (~85%) buys out ~15% minority at **HK\$3.75/share** · total ~**HK\$7.6bn** (~USD 970m)
- **Scheme of arrangement:** 75% by value for + ≤10% against + court sanction → binds 100% → clean delisting (2023)
- **Certain funds:** financing fully committed before announcement, no MAC walk-away
- Model: post-deal **net debt/EBITDA < 2x**, **DSCR > 1.5x**; stress = snacks decline + RMB depreciation
- **Biggest risk = cross-border cash path:** offshore HKD debt ← onshore RMB dividends → PRC distributable profits, **10% withholding tax**, SAFE/FX approvals
- Covenants: share charge, dividend lock-up, cash sweep, DSCR early-warning triggers

4 · Your own numbers (say them without thinking)

- 5+ years, Bank of China Macau · loan book **HKD 8bn** · deposits **HKD 7bn** · **10+ deals, USD 2bn+**
- **HKD 30m+ NII in 2025, +10% YoY · zero violations** · Fudan finance degree · Cantonese native, full professional English & Mandarin · Python/SQL

5 · Formulas & links

DSCR = (EBITDA – Tax – CapEx) / (Principal + Interest) → healthy > 1.2x
UFCF = EBIT × (1 – t) + D&A – CapEx – ΔNWC
Links: NI → Retained Earnings | NI starts the CFS | ending cash → BS Cash
Working capital: asset UP = cash DOWN · liability UP = cash UP

6 · Whiteboard drill — "Depreciation up by 10" (t = 25%)

IS: EBIT –10 → tax –2.5 → Net Income –7.5
CFS: NI –7.5, add back D&A +10 → CFO +2.5 → cash +2.5
BS: Cash +2.5, PP&E –10 → Assets –7.5 = Retained Earnings –7.5 ✓ balances
Punchline: "Cash actually goes UP – depreciation is a tax shield."

7 · Answer skeletons (first line + beats — not scripts)

Q	First line → beats
A1 Yourself	"My name is Horace Loi — five years in corporate banking at Bank of China, Macau." → 8bn book, USD 2bn+ deals → 3 strengths: deal docs, credit & cash flow, KYC (+ Python/SQL) → "Haitong: European standards × China business — that's where the future is."
A3 RM→Analyst	"For me this is about the platform, not the title." → structured finance / capital markets / European angle → "And it's a good deal for you — an Analyst who already knows clients and the full deal process."
B1 STAR	Fact box §3 → certain funds → cash path → model numbers → covenants → "delisted 2023 — the deal I'm proudest of."
D1 3 statements	One-liner each → the three links → "it's a loop — change one number, it flows through all three."
D5 FCF/DSCR	Definition → UFCF formula → "banks care because of DSCR — above 1.2x is a safe cushion."
§11 Challenge	"The franchise is strong in advisory and DCM — but there's a structural vulnerability." → 2025: +54m→–13m, fees –91% → NII covers ~⅓ of costs, licence idle, HO loan 275m → "That gap is exactly what I fill." → your numbers → "turn a single-engine model into a real bank, protecting asset quality as you scale."

Q	First line → beats
E1 Close	"Before we finish, I want to be straight with you — the more we talk, the more I feel this is the right place. If Haitong is interested, I'm ready to move forward. Is there anything about my background that worries you?"

8 · Questions to ask him

- "What does the Corporate Banking deal pipeline look like, and which cross-border transaction types will the Branch focus on first?"
- "Now that the deposit licence is in place, how does the team plan to sequence the first corporate deposit relationships?"
- "How does the Branch work with the European offices and the Guotai Haitong network on cross-border deals?"

9 · If asked — salary & notice

- **Salary:** "My priority is the platform and the growth path. I'd expect the package to reflect five years of directly relevant experience rather than a fresh-graduate profile — I'm confident we can align if the fit is right. May I ask the band for this role?" (Decide your floor **before** you walk in.)
- **Notice:** "My contract requires [X] days' notice — I can start on [date] and will manage a clean handover." (Check your BOC contract tonight.)

10 · Logistics

- [] 3 printed CVs (EN) · notebook + pen · phone silent
- [] Arrive 15 min early · interviewer's name · outfit ready tonight
- [] Sleep 7h+ · morning: this card only, nothing new

Mindset: you are not begging for a seat — you are the second engine they are missing.
Calm, warm, specific.
